PRODUCT INFORMATION

In the Blue Lagoon UV-C Tech, UV-C radiation with a wavelength of 253.7 nm is generated by the special lamp, which produces a bactericidal action. The Blue Lagoon UV-C Tech provides clean, fresh and clear water in an efficient and environmentally friendly manner. The water is fed through the UV-C machine by a pump.
The UV-C radiation neutralises bacteria, viruses and other primitive organisms and prevents them from reproducing. In addition, the stainless-steel interior reflects the UV-C radiation, thereby increasing the efficiency by up to 35%. With the Blue Lagoon UV-C Tech your water will be efficiently and safely disinfected, providing you with excellent water quality.
