

VGE Pro Low pressure lamp UV system type Control timer 140- 76 (7030122)

VGE PRO
UV DISINFECTION SOLUTIONS

TECHNICAL SPECIFICATIONS

Type

Control timer 140-76

PRODUCT INFORMATION

VGE Pro Inox system provides perfect disinfection thanks to its high power and advanced treatment around the UV lamp. It uses a high quality 316L stainless steel reactor, and the high quality welding process passes all the leak tests. The pickling and passivation treatment improves the corrosion resistance and lifetime of the unit dramatically. The glass pearl coating gives the unit a premium outlook. VGE Pro Inox system is equipped with the unique Smart Pin technology, which makes it possible to replace the lamp safely even though the system is filled with water and pressure. The controller is equipped with a LED display for showing the operational lamp hours.

Features:

- High corrosion resistance
- Leak tested
- Smart Pin technology
- UV radiation reflection
- Easy to install
- Controller with timer
