

Rotary scraping tool type for pipes 63-250 mm (7036605)

TECHNICAL SPECIFICATIONS

Type

for pipes 63-250 mm

PRODUCT INFORMATION

Looking for a reliable and efficient solution to handle your pipe scraping needs? Look no further than our Rotary Scraping Tool. Designed for all SDR rated PE pipes ranging from 63mm to 250mm, this tool features a durable 4-edge tungsten scraping tip and a lightweight die-cast aluminium body for easy handling and maximum durability. With its spring-loaded scraper tip, the Rotary Scraping Tool is perfect for scraping irregularly shaped pipes with ease. It has a scraper length of 130mm and a cutting depth of $0.25\text{mm} \pm 0.05\text{mm}$, ensuring precision and consistency every time. Whether you're a professional in the industry or a DIY enthusiast, the Rotary Scraping Tool is the perfect choice for all your pipe scraping needs. Order now and experience the reliability and efficiency of our Rotary Scraping Tool for yourself!
