PRODUCT INFORMATION

The Kontrol 800 Panel is a pre-assembled, panel-mounted system that manages and adjusts pH and chlorine levels with automatic proportional dosing for public pools.

Features:

- Alpha numeric display (4 lines 20 characters) for easier reading
- Control unit with full parameter access for complete monitoring
- Communication via Serial Port RS48 by Modbus RTU/Ascii protocol for remote control interface
- Easy parameters setup for quick technical overview
- Amperometric and potentiostatic control
- KommBox or KommSpot gateway devices enables access to SekoWeb
