

Control system 110/230VAC type RM-Eco10 (7023838)

TECHNICAL SPECIFICATIONS

Type	RM-Eco10
Voltage	110/230VAC
IP value	IP44
Max. Performance	90 Watt
Length	200 mm
Height	398 mm

PRODUCT INFORMATION

The RAINMASTER Eco is a fully automatic, operating, and monitoring station, combining pump, controller, and built-in mains water top-up. The rainwater is pumped from a tank via a suction hose and is used internally for toilet flushing and the washing machine, and externally for watering the garden. If the supply of rainwater or greywater runs low then the RAINMASTER Eco automatically switches to mains water top-up, so you'll never be out of water.
