Number of Stations	1

PRODUCT INFORMATION

Quick and easy irrigation with the BTT Watertimer. Care for plants in gardens, greenhouses, flowerbeds and small lawns with the utmost precision, thanks to the Hunter BTT Watertimer. Install the water timer between the tap and the garden hose and control it conveniently with your smartphone. Watering the smallest crops becomes easy and affordable, thanks to the BTT. Find out how it works. It only takes a few moments to instal the water timer to every standard hose with a thread. The press button on the timer allows you to switch on the irrigation manually too. Specifications of the BTT Watertimer - One water timer controls up to two zones. - One smartphone controls an unlimited number of controllers. - Running times vary from 1 second to 24 hours with 4 start times for maximum programming flexibility. - The irrigation cycle is continuously repeated within the defined water windows. It is perfect for drip irrigation systems and seed germination. - Batteries included. Even more advantages - Put the irrigation on hold for up to 99 days in low season. - Avoid wasting water with the automatic water shutoff that is activated after one hour. - Flashing LED warning light reports that the battery is nearly empty. - Safe password security to prevent unauthorised changes to the schedule. It's easy to manage your irrigation system from a distance. Enjoy its convenience at first hand.
