

# Pipe scraper tool (7036608)

# PRODUCT INFORMATION

Are you looking for a reliable and efficient tool to prepare your large diameter PE pipes for installation? Look no further than our Solid Pipe Scraper, designed specifically for PE pipes with diameters ranging from 200-400mm. Our Solid Pipe Scraper is built to handle even the toughest pipe surface preparation tasks. The durable, solid construction ensures that the tool can withstand the demands of even the most challenging jobs, providing you with long-lasting performance and reliability. With a design that allows for quick and easy use, our Solid Pipe Scraper saves you time and effort on every project. The scraper is designed to remove debris and smooth out the surface of the pipe, allowing for a faster and more secure connection. At Bosta/Bevo, we pride ourselves on providing high-quality tools that help you achieve optimal results on every project. Our Solid Pipe Scraper is no exception. Whether you're working on a large-scale construction project or a smaller installation, our scraper is the ideal tool for achieving a smooth, clean surface that ensures a secure connection. Invest in the best with our Solid Pipe Scraper and experience the benefits of working with high-quality tools. Order now and take your pipe surface preparation to the next level.
