

Pentair Extension unit (7010803)

PRODUCT INFORMATION

The 4X Extension makes IntelliPool™ even more user-friendly. It is one step further towards full automation of your swimming pool environment and your wellness experience.

Features:

- Extends the options of the system to connect more applications
- Small device that can be built into the electrical box
- Four extra inputs and outputs plus a connection for the solar panel
- More devices can be operated like garden lighting, infinity pool, waterfall or the spa via the internet or the remote control
- Fitted with an emergency stop so that in case of danger the application or the whole system can be switched off with one press of the button
