

Pentair Control system type Speedeo Connect (7035814)

TECHNICAL SPECIFICATIONS

Type

Speedeo Connect

PRODUCT INFORMATION

Speedeo Connect controls your variable speed pump, your lighting or your pool heating. It can adjust the filtration time depending on the water temperature and therefore improve the water quality. It also has a freeze protection function, which is very practical in winter if your pool is in active wintering mode. And thanks to its WiFi connection, you can now access, control or modify these parameters from anywhere. So wherever you are, you are reassured and fully in control of your pool. Speedeo Connect connects directly via WiFi or Lora (Long range radio) thanks to the Pentair Gateway (sold as an option) when the WiFi is not available close to your pool room.

Features:

- Controls the variable speed pump and adapts the filtration time according to the water temperature
- Either directly via Wi-Fi, or with the Pentair Gateway (Part no. 7035819) option
- Controls filtration, lighting and heating control
- Possible to combine with Soleo to manage the water treatment
