TECHNICAL SPECIFICATIONS

Colour	black
Pressure	1,5 bar

PRODUCT INFORMATION

Features:

- Fixed speed of 10 rpm for consistent and predictable dosing performance
- Dosing capacity of approximately 1.5 litres per hour, ideal for controlled chemical injection
- Maximum operating pressure of 1.5 bar, suitable for standard pool and water treatment installations
- Peristaltic pump principle reduces risk of chemical backflow and contamination
- Compact black housing that integrates easily into existing dosing and filtration systems
- Designed for precise dosing of liquid chemicals such as pH regulators and disinfectants in swimming pool water treatment

Included as standard:

- 4 meter dosing hose 4×6
- Foot filter
- Injection valve
- Wall bracket
