

3-way actuated L-bore valve L-bore PVC-U 1 1/2" female thread 1,5bar 24VAC white type Electronic side connection (7018962)

TECHNICAL SPECIFICATIONS

Colour	white
Type	Electronic
Material	PVC-U
Operation	actuator 24VAC
Colour lever	red
Switching time	26 sec.
Material seal	PTFE/EPDM
Ball bore	L-bore
Connection type	side connection
Connection	female thread
Voltage	24VAC
Torque	7 Nm
Pressure	1,5 bar
Size	1 1/2"

PRODUCT INFORMATION

The electronic 3-way valve controls the warm water supply into your pool via two sensors. One is built into the housing of the valve and the other one is placed into the pool connected via a 10 metre cable.

The display shows the current water temperature and you can manually set the desired temperature. Pool water will automatically be directed through the heater to gain heat and as soon as the temperature has been reached, the valve will switch over and send the water from the pump directly into the pool.
