

Salt 25000g type Poolsel®

(0891807)

TECHNICAL SPECIFICATIONS

Type	Poolsel®
------	----------

Weight	25000 g
--------	---------

PRODUCT INFORMATION

Poolsel® contributes to safer use of your swimming pool and increased swimming comfort. Poolsel® has been produced on the basis of natural coarse sea salt (with an exceptional high purity level and a low sulphate content) and contains no toxic anti-caking agents. Poolsel® is used for optimisation of the salt level and the production of chlorine via electrolysis, which means a limited use of chlorine products! For membrane electrolysis we advise you to use Soft-Sel® Plus salt tablets.

Application:

- Salt for swimming pools/electrolysis (not for membrane electrolysis)
- Sea salt for optimisation of the salt level

Characteristics:

- Salt crystals – grain size: 1-2 mm
- Very high purity, good solubility
