------------------	-----------------

Diameter	150 mm
----------	--------

Temperature range	-10°C - 100°C
-------------------	---------------

Pressure	8 bar
----------	-------

Content	5 ltr
---------	-------

Size	1"
------	----

Connection	female thread
------------	---------------

Height	300 mm
--------	--------

PRODUCT INFORMATION

The AG05 serves to limit the switching frequency of the pumps and pressure boosting systems and to minimise pressure surges with quick shutting consumers. For instance, the AG05 is used with the RMF-SC20 or RMF-SC40.
