PRODUCT INFORMATION

The Norsup Veluna LED pool light combines high-quality materials with a refined finish and a fully integrated design, delivering both performance and aesthetics at the highest level. Its ultra-thin glass construction creates a sleek, exclusive look that enhances any pool environment. Designed as a complete all-in-one lighting system, Veluna includes the light, wall conduits, and build-in parts, engineered to work seamlessly together for optimal reliability and a flawless finish. Powered by advanced LED technology, Veluna ensures superior illumination while maintaining energy efficiency and long-lasting performance. Installation is simple and efficient, making it the ideal solution for both new pool builds and retrofit projects. Available in both RGBW for dynamic colour experiences and warm white for a more elegant, ambient atmosphere, Veluna offers the flexibility to match any pool setting.

Features:

- All-in-one lighting system
- Ultra -thin glass construction with only 2mm thickness
- Easy installation thanks for unique coupling system
- Suitable for all type of pools
- Retrofit option for PAR56
- Colour temperature 3500 Kelvin for warm white
