Aqualoon	320 g

DIMENSIONS

A	250 mm
B	435 mm
C	510 mm

PRODUCT INFORMATION

Energy efficient filter set for small above ground pools.
The Aqualoon® filter medium reduces resistance in the filter so the power consumed by the filter pump is just 100 watts. Because of the low power consumption, the filter pump runs very silently.
Needless to say, Aqualoon® filter medium delivers the required clear water quality.
Just like traditional filter sand, Aqualoon® has no effect on chemical water management.
You will need to rinse out the Aqualoon® filter medium several times a season, according to the level of dirt caused by using the swimming pool. The fact that cleaning is not carried out by

backwashing, saves water.
The filter medium (320 gr.) is included, which means the filter set is ready for immediate use.

Equipped with RCD differential plug (30 mA).
