Capacity	0,11 - 0,86 m^3/h
Capacity	1,79 - 14,28 l/min
Angle	28 °
Max diameter	9.2 m
Radius	4,6 m

PRODUCT INFORMATION

Hunter Pro adjustable nozzles Adjust the nozzle of your sprinkler system to make the difference between a failed crop and a good crop, a colourful landscape and a parched landscape and regular growth in your crops and irregular growth. Hunter Pro adjustable nozzles cover every corner that needs it, in every landscape, with the accuracy of a fixed nozzle. Hunter nozzles are accurate and fully adjustable to every angle between 0 ° and 360 °. There are seven models of sprinkler cap available; the distances covered range from 4 to 17 metres. Specifications - Adjustable between 0 and 360 degrees for maximum design flexibility. - Easy-grip top for easy adjustment. - Sturdy edges with a well-defined pattern so the wind cannot get a grip on the jet. -

More consistency thanks to the large drops generated by the nozzles. Extra features - Matching precipitation rate on every nozzle from 8A to 17A, for more consistency, regardless of the nozzle used. - Colour-coded for easy identification in a field or landscape. Do yourself or your customer a favour with accurate irrigation using the Hunter Pro adjustable nozzles.
