

Hunter Key plastic/stainless steel type MP Rotator (7032568)

Hunter®

TECHNICAL SPECIFICATIONS

Type	MP Rotator
Material	plastic/stainless steel

PRODUCT INFORMATION

What does every irrigation specialist always have to hand? The MP tool. It's easy to adjust the MP Rotator's arc with the MP tool. Every irrigation specialist's case should include this piece of kit. Adjusting the MP Rotator quickly is easy with the MP tool. You can adjust the angle of the spray in no time at all. Quick adjustments for more consistency have never been easier. Turn the screw clockwise four times all the way round to reduce the jet, or four times counter-clockwise all the way round to increase the jet. Specifications of the MP tool - Alter the MP Rotator's jet with the MP tool or a slotted screw driver to reduce the jet to 25 per cent. - The MP tool is small and easy to carry. Make life easier by always having the right equipment to hand.
