

Decoder cable copper black
100m type 2 x 2,5 mm²
(7033948)

TECHNICAL SPECIFICATIONS

Colour	black
Material	copper
Suitable for	connecting controller to decoders
Material housing	PVC
Length	100 m
Temperature range	-5°C - 70°C
Type	2 x 2,5 mm ²

PRODUCT INFORMATION

The decoder cable is ideal for connecting decoders for irrigation, such as for a landscape area or a golf course. It is also used to connect sprinklers to decoders in irrigation systems for parks and public spaces. The advantage is you need less electrical cable because it is two-wired and can go in one line around the installation. This cable is also used for the FX luminaire light system which you can use to complete your irrigation system, giving it the finishing touch!
