

The image displays two identical black manifold valves, one positioned above the other. Each manifold has a horizontal black body with five vertical ports. The top manifold's ports are capped with blue hexagonal caps, while the bottom manifold's ports are capped with red hexagonal caps. On the left side of each manifold, there is a brass-colored pressure gauge with a white face and black markings, and a small brass-colored valve handle. The manifolds are held together by two black vertical brackets, one on each side. The entire assembly is set against a plain white background.

TECHNISCHE SPECIFICATIES

Kleur	zwart
-------	-------

Type	Geo Flow
------	----------
